Introduction
It’s all about connectivity

Smart Three LLC is a leader provider of strategic IT services and solutions designed specifically for small, medium and large enterprise organizations. Our solution-based services are founded on mature internal competencies in IP Communication, IP Telephony, IP CCTV and Wireless Enterprise Solutions. We are redefining the level of our services to a more high quality standard to provide an efficient, reliable and cost-saving solution in the local market.

Smart Three LLC is constantly growing in response to the needs of our customers in all sectors and verticals. From software and hardware procurement to deployment planning, configuration and data center optimization, Smart Three offers custom IT solutions for every aspect of your environment. We are extremely well-positioned to help organizations maximize their technology investments and minimize the costs and risks associated with managing their IT infrastructure.

Smart Three LLC is a privately held company, with considerable assets. We are financially strong and debt-free. Headquartered in Abu Dhabi UAE with Dubai Branch, we provide IT maintenance services in over 100 companies. We started our business in 2005 and enable us to expand our range of services continuously.
Our Mission

At Smart Three LLC, our mission is to help our customers consolidate their IT infrastructures for improved:

- Efficiency
- Flexibility
- Cost Control
- Manageability
- Security

We focus on four main areas that deliver the most value to our customers:

- Providing multi-vendor, multi-platform, multi-layered service solutions for enterprise wide support and single point of contact.
- Focusing on the business needs and processes of customers.
- Providing cross-industry technology service solutions with a qualified, certified team of sales engineers and an extensive nationwide network of strategic partners and facilities.
- Maximizing the value of customers’ technology investments by providing long term service plans regardless of age of equipment, or manufacturer, or even if the manufacturer has discontinued service directly.

Our Vision

Smart Three LLC vision is to become the premier provider of strategic information technology solutions in the Middle East and nationwide.

When you do business with Smart Three LLC, you’ll get the best return on your technology investment while realizing the lowest total cost of ownership for service.

Our Solutions

Smart Three is one of UAE’s most trusted IT solution providers

**Smart Three LLC** offers project based technology solutions focused on IT infrastructure, as well as end to end operational outsourcing solutions for all sectors. We provide our clients with the best IT people and we senior technical experts in key technology areas like virtualization, storage, managed IT/outourcing, networking, collaboration, user support, and Data Center.

We work directly with our clients to design and implement enabling technologies that will accelerate their core business. Our capacity to deliver business value through efficient and well designed IT solutions is a foundation to our strategy of developing long-term customer relationships and becoming a trusted advisor.

**Smart Three LLC** has proven capabilities in a number of specialized practice areas, each of which combine to provide unmatched end to end solutions and services:

1. IP Telephony (VOIP) Solutions
2. Indoor & Outdoor Wireless Solutions
3. IP CCTV Solutions
4. Access Control Solutions
5. Video Conference Solutions
6. Servers & Network Storage Solutions
7. Structured Cabling Infrastructure Solutions
8. Software & Hardware Solutions
Our Solutions

Our rapid growth, customer references and our ability to attract the very best IT experts has made us a leader in providing companies with innovative, flexible, and cost effective IT solutions & services.

IP Telephony (VOIP) Solutions
Success in business these days takes more than the telephone and traditional PBX equipment. It requires IP telephony solutions to support voice over IP (VoIP), open standards like SIP, mobile workers and the unified voice and data communications business now demands. Interactive Intelligence offers everything the modern enterprise needs in your choice of all-in-one IP telephony solutions to fit your organization, scaling from 100 users to more than 15,000 users.

Indoor & Outdoor Wireless Solutions
For a business, one of the main advantages in setting up a wireless network is savings. You can access the changes in your business in a short period of time after installing the wireless network. There is no need to spend money on cables and other equipments. The cost of maintaining a wireless network is also less when compared to other network interfaces. Wireless network interface is popular because of its convenience, availability, reasonable cost and accessibility.

IP CCTV Solutions
IP CCTV is a comprehensive surveillance solutions that empower your security staff, drive productivity improvement and make your facilities safer and more secure. From closed circuit television (CCTV) systems that monitor perimeter fencing, points of entry/egress, docking stations and hazardous work environments to advanced applications that integrate monitoring and control of access control, security management and digital video surveillance/retrieval.

Access Control Solutions
During this period of very rapid changes in innovative technology, the demand on biometric systems has been on the increase as people want to keep their lives more convenient and more secure. Providing the desired enhancements to all sectors by way of improved security systems such as access control and time attendance, embedded modules, pc solutions, live scanners, passport readers, and door lock and safe.
Our Solutions

Get the most out of your IT investments and improve operational efficiency, through Unified Communications Solutions

**Video Conference Solutions**

Today, video conferencing systems transcend the simple "talking heads" on a screen. The ability to easily share any type of information has added another dynamic to video communications, often previously not even possible in a local meeting. Decisions are made faster; bringing products or services to market quicker; and enabling you to stay ahead of your competitors.

- Saves more money
- Saves time
- Reduces travel costs
- Increased productivity
- Support for environmental initiatives

**Servers & Network Storage Solutions**

Network storage can become a competitive advantage when companies use it to more efficiently and effectively leverage their data. Data storage and management only gets more complex as the amount of data grows and more government regulations about data retention are passed.

With a network storage system, you can control the backup schedule for all of your business data, you can make backups an automatic process that happens according to the schedule that best supports your company’s business hours and you can ensure that all of your company's information is being backed up.

**Structured Cabling Infrastructure**

Structured Cabling Systems are at the base of modern information network. Designed to accommodate quickly and cost effectively frequent moves adds and changes a structured cabling system can alleviate workflow disruptions and network downtime associated with enterprise restructuring.

A structured cabling system provides a platform upon which an overall information system strategy is built. With a flexible cabling infrastructure, a structured cabling system can support multiple voice, data, video and multimedia systems regardless of their manufacturer.

**Wireless Point to Point to Multi-Point Solutions**

The Point-to-Point Link is ideal for Government, Municipalities, operators and wireless ISPs that are deploying city hotzones. It can also be used for connecting remote office buildings. Designed as an integrated system that is easy to install and requires no external outdoor casing, cables and other accessories, it is a cost-effective solution for wireless projects.

The Point-to-Point Link can work as a broadband backbone for hotspots, outdoor coverage access points and DSL switches. Carriers will find the Point-to-Point Link attractive because it can be used to distribute fiber optic network capacity and acts as a broadband backbone for DSL switches and routers.
Our Solutions

The Apple Store

We can help you discover the Apple product that is right for you.
